Company Overview

Alertus Technologies, LLC builds and implements in-building emergency notification systems. The company offers wall-mounted alert beacons and peripherals, such as panic buttons and overhead LED marquee that flash/sound and then display emergency notifications; text-to-speech voice annunciation interfaces to public address speaker, fire alarm, and outdoor giant voice systems; Digital Signage Override software, which transforms digital signage and cable TV systems into emergency alerting appliances; and computer desktop alerting software. Its products are installed in universities and colleges, K-12 school districts, boarding schools, and military bases, as well as government, medical, corpor...

Alertus Technologies, LLC Key Developments

Alertus Technologies Expands Airport Solutions

Jan 25 17

Alertus Technologies announced its expansion in the airport solutions sector with the recent addition of Vail/Eagle County Regional Airport. Other recently deployed airports include the Kansas City International Airport and Wilkes-Barre Scranton International Airport. Airports and other critical infrastructure are often confronted with fragmented communications and life safety systems. Alertus' emergency notification system is designed to cost effectively integrate communications and facilities systems to monitor for emergency situations and speed the dissemination of urgent alert information.
